

Duni Salad Bowl.
It's perfection.

Just the best. No compromise.

The new Duni Salad Bowl brings out the best in every salad. A salad bowl that gives you everything you've ever wanted. We're talking about stability, design, size, colour and accessories – all in one perfect solution. It's the salad bowl designed to cut your costs and boost your sales. So now you can forget about compromise.

Designed to cut costs.

Thanks to its sturdy construction, Duni Salad Bowl contributes to fast, efficient logistics. It's simple, practical and safe for transport. And it stands stable on the storage or shop shelf.

With our sealing equipment you can use MAP (modified atmosphere packaging) to keep the salad fresh longer. The sealable bowls are 100% leak proof. If the sealing machine should stop, production can continue with tight lids.

Duni Salad Bowl is the cost-effective showcase your nutritious salad deserves.

Designed to boost sales.

Your customers are certain to appreciate the fact that the lid, which is so easy to open and close, seals so effectively. The lid can also hold a “spork” – a simple, functional eating utensil.

The Duni Salad Bowl design practically invites purchase from the shop shelf. There are two colours to choose from – indigo and transparent – in sizes 0.6 and 1.0 litres. With your logotype on the lid, your brand comes into focus, all the way to the consumer.

Duni Salad Bowl is, in other words, the profit machine that your attractive, tempting salad can benefit greatly from.
